

## Brooke Shields and Coolifting

Great Genetics + Cosmeceutical skin care = graceful ageing.

How amazing is Brooke's skin looking over the years? We suspect a use of Vitamin C serum every morning for an antioxidant hit to fight against free radicals, combined with Retinol at night to encourage normalised cell renewal. Not to forget that most important product SPF to be used daily.

Skin care goes hand in hand with clinical facials and there no better facial when it comes to ageing than the Cool Gun. The Coolifting gun sprays the facial tissues using a powerful CO2 flow at a very low temperature and high pressure, combined with an extremely high concentration of atomized actives. It is the most spectacular and rapid treatment ever seen to challenge the passing of time.

Coolifting leaves the skin supple, hydrated and GLOWING!

- INCREASE IN COLLAGEN PRODUCTION
- NO SIDE EFFECTS (Unless allergic to ingredients)
- AFFORDABLE
- IMPROVEMENT IN MICRO CIRCULATION

## FAQ

### How it works?

The Coolifting gun jet sprays the skin using a powerful CO2 flow, at a very low temperature and very high pressure combined with concentrated atomized anti-ageing, hydrating, lifting and de-pigmenting ingredients.

### How many sessions do I need?

One session for visibly smoother, nourished and more radiant skin. We recommend 6 sessions, 1-2 per week to roll back up to 10 years from your skin.

### Does it hurt?

The pressure & temperature are technically controlled. There is no discomfort at all which is very refreshing on the skin.

- 1- Before treatment
- 2- After one session
- 3- After one month
