What they are: Light source treatments like *Ionithermie* in fact use a device with an ultra-high frequency with infrared light and vacuum suction being reviewed for the FDA. Electrolysis treatment like *Ionithermie* is a non-invasive treatment that uses light energy to break down fat cells in the body in order to reduce cellulite and improve the appearance of the skin. *Ionithermie* is a non-invasive treatment that uses light energy to break down fat cells in the body in order to reduce cellulite and improve the appearance of the skin.

Dr. Ustinova performs facials and cellulite treatments with the *ioni* treatment system. *ioni* is a revolutionary skin treatment and far-infrared light treatment that combines galvanic and thermal energy to extract toxins from the skin. *ioni* treatments are available in San Francisco.

"I've seen treatments shrink thighs by an inch in circumference," says Goldman.

Slimmer in an hour! (no its not a joke)

HOW MANY SESSIONS WILL I NEED?

Unfortunately, there is no exact way to tell as everyone's so different. However, the following factors will determine your results:

- 1) **Extent of problem** (incl hormonal & hereditary variations)
- 2) **Desired outcome** (Reduction of 1cm vs 30cm)
- 3) **Your body response** (can be affected by medical conditions or lifestyle issues)

Most people have opt for a course of **5-10 sessions**
