

# INJECTABLES

## Discover the difference with us

**Knowledge | Skill | Methods | Results | Approach | Ethics**

- Flexibility:** The injectable clinic operates 6 days a week including Saturdays
- Variety:** Enjoy a large variety of wrinkle relaxation & filling products. We are all unique and different products work for all of us differently
- Value:** Price consists of 2 components: cost & value. We offer the best!

**we believe that less is often more**

## Results & techniques

Once you discuss your concerns with our specialist you can decide on what the focus of the treatment will be.

The area will be numbed and gently injected. Our techniques ensure a comfortable experience.

Remember - purpose of the treatment is to **enhance and harmonise your best features.** After all, the ideal face feature is only a matter of millimetres!

the difference between  
**PERFECT & IMPERFECT face**  
is only 1.618mm (golden ratio)

## Ethics & integrity

Consultation process is far more in depth than ever before. Medical history including herbs/medications is examined.

You receive a detailed explanation of the process, differences between various products & how it all relates to treatment.

Sadly, many injectors don't bother going into the explanations as it takes too long. It is important that you understand this part so you can **make a fully informed decision!**

## Our promise to you

**The big question is: How to ensure that your injector gives you their best? How to get the most out of your injections?**

Sadly, the speedy in-out approach (driven by the earning potential) is on the rise, resulting in increased consumer dissatisfaction, which portrays the industry negatively.

**we strive to change that—each time you visit!**

**We focus on YOUR NEEDS!**

## Method & approach

You'll be impressed with the careful examination of your facial structure our injectable specialist performs.

What most of our patients look for is an **enhancement, refreshment & harmony of their natural features.** We approach enhancements with caution, conservatively.

Our injector has a **great eye for detail** and uses **subtle yet powerful techniques** to achieve a youthful balanced look for you & long lasting results
